

BB GLOW SKIN NEEDLING

STEP BY STEP

PRACTICAL EQUIPMENT AND MATERIALS

- DermaPen & titanium cartridges (0.2 -0.5 mm)
- Topical anesthetic cream
- Bowl filled with sterile sodium chloride (saline) solution
- Exfoliating Gel
- Neutralising Foam
- MTS Booster Serum Ampoules
- BB Glow Mesotherapy Ampoules
- Sanitizing solution
- Small gauze squares
- Latex gloves or equivalent
- Sharps box

SKIN PREPARATION

STEP 1

Cleanse and optional anaesthetize

- Cleanse the skin as normal and pat dry.
- Apply a topical anesthetic cream such as 2% Lidocaine on the entire treatment area 20 minutes prior to treatment.
 - Wash of the anesthetic cream, pat skin dry and apply a layer of sodium chloride (saline) solution.
 - Exfoliate the skin, rinse off, pat to dry.
 - Neutralise the skin, rinse off, pat to dry.
- Apply the MTS Booster Serum or BB Glow serum to the skin.

STEP 2

Prepare and Sanitise

- Remove the Titanium Cartridges from the sterile packaging and place it on a clean tissue or towel, attach to the DermaPen.
 - The Titanium DermaPen cartridges does not need any further sanitization. It is ready for use.

STEP 3

Use Of the DermaPen Technique

- Visually divide the skin into sections (forehead, left cheek, right cheek, nose, chin, etc.)
- Hold the DermaPen close to the needle head, providing greater control and accuracy of application. Hold tight the surrounding skin with a free hand. Holding the DermaPen directly over the targeted area, repeatedly press the needles into the skin numerous times ensuring the whole localized area receives repetitive needling. There is normally no bleeding during the treatment, however, if bleeding occurs cleanse this section with moist gauze and continue as normal.
- Repeat the application of MTS Booster Serum and needling over the targeted area.
- Apply the BB Glow serum and needling over the targeted area; repeat it twice.

PLEASE NOTE: if you combine the MTS Booster Serum with the BB Glow Serum – you needling twice with the MTS and twice with the BB Glow; if you apply the BB Glow serum only, you go 4 times around the targeted area while reapplying the serum each time.

STEP 4

Skin Calming

- Apply the Face Mask to calm down the skin after needling; it is recommended to apply the mask that will target specific skin conditions such as hydration, brightening or anti-aging. Optionally, you can also use the LED Light Therapy to enhance the benefits of treatment.
- Gently cleanse this skin with moistened gauze or sponge and apply the repair cream.

Control for client discomfort

Ask your client to verbally express their degree of discomfort on a scale from 1 to 10 with 1 being low and 10 being high. You should decrease the amount of applied pressure during the needling process for scores over 7.

THE TREATMENT PROTOCOL (120 min)

1. Remove all makeup and cleanse face thoroughly.
2. Lightly apply toner on the face with a cotton pad.
3. Apply the **Stayve Exfoliating Gel**. The MTS treatment is more effective after exfoliating. It is not recommended to use any other exfoliating gel besides the one included in the MTS treatment.
 1. After cleansing and toning, using a brush, apply a thick layer of the **Stayve Exfoliating Gel** on face, neck and decollete, avoiding eye area.
 2. Leave on skin depending on its sensitivity. Sensitive or dry skin: up to 2 minutes; normal skin: up to 3 minutes; oily skin: up to 5 minutes. Do not massage into the skin!
 3. Wash face or wipe with a damp towel or sponge.
 4. The exfoliating gel's acidity may cause slight tingling and redness is a normal skin reaction to acids.
4. Apply the **Stayve Neutralising Foam** with a brush. This foam lowers the acidity caused by the exfoliating gel. Use hands to gently massage the face for 3 minutes. Wash face or wipe with a damp towel or sponge.
 1. Apply a generous amount of the **Stayve Neutralising Foam** to the skin, avoiding the eye area, to neutralize the acidified skin after exfoliation.
 2. Gently massage for 2-3 minutes and then rinse off the skin with a damp sponge or towel compress, dry the skin and apply tonic.
5. Begin the MTS treatment (2 – 3 minutes) after applying the **MTS Booster Serum Ampoule** using **DermaPen**. The booster serum ampoule comes in various types to meet your skin's needs: acne, salmon, peptide, lifting, whitening and aqua. You can buy each type individually or a set of all types MTS Booster Serum Kit.
6. Regular **BB Glow Ampoule** can be applied instead of the Booster Serum Ampoule, but the BB Glow is more effective when used after application of Booster Serum.
7. Begin the MTS treatment (2 – 3 minutes) after applying the **BB Glow Ampoule** using **DermaPen**.
8. Apply a **Face Mask** to reduce irritation. You can also use the LED Light Therapy for 10 – 15 minutes. This step can be skipped if you don't have the device.
9. After removing the mask, cleanse the face with a damp sponge and apply the **Stayve Repair Cream**. For aftercare, use the **Stayve Repair Cream** every day after cleansing. We also recommend applying
10. **Booster Serum Ampoules** at home to provide nutrients and maximise effectiveness.

Purpose:

Professional cosmeceutical with the use of MTS device

Colour/Shade:

No's. 1 light, No's. 1-2 light rose, No's 2 medium, No's 3 deep, No's 3-2 – darkest shade

Texture:

Liquide/at the middle of watery and creamy

Size/Exterior:

Width 2.2cm x length 4.8cm

Volume:

8ml e/0.27 fl oz

INGREDIENTS

Water, Hydroxyethyl Cellulose, Glycerin, Niacinamide, Propylene Glycol, Disodium EDTA, Phenoxyethanol, Allantoin, Titanium Dioxide, Aluminium Hydroxide, Triethoxycaprylsilane, CI 77491, CI 77492, Dimethicone, Cyclomethicone, Cetyl, Ethylhexanoate, Mineral Oil, Polysorbet 80, Stearic Acid, Cetearyl Alcohol, Glyceryl Stearate, Sorbitan Stearate, Sorbitan Sesquioleate, Tocopheryl Acetate, Camellia Sinesis Leaf Extract, Bambusa Vulgaris Extract, Borago Officinalis Extract, Citrus Unshiu Peel Extract, Ligustrum Japonicum Fruit Extract, Cnidium Officinale root Extract, Rhus Semialata Gall Extract, Opuntia Coccinellifera Fruit Extract, Astragalus Membranaceous Root Extract, Prunus Persica (Peach) Kernal Extract, Pinus Sylvestris Leaf Extract, Pueraria Lobata Root Extract, Ginkgo Biloba Leaf Extract, Trichosanthes Kirilowii Root Extract, Rh-Oligopetide-1

Niacinamide is a water-soluble vitamin that penetrates well through the stratum corneum. Its uniqueness is evidenced by the fact that it stimulates the synthesis of collagen and increases the production of ceramides, which are the main component of the lipid protective barrier of the skin. By reducing transdermal water loss, it causes better skin hydration and improved elasticity.

At the same time, it is a powerful antioxidant that helps protect the skin against UVB radiation and against free radicals. Lightens sun discoloration, prevents the formation of further, anti-inflammatory and shortens the healing period of existing inflammatory changes. It shows great results in the fight against acne lesions and narrows the mouth of the sebaceous glands.

The BB Glow serum also contains special peptides called EGF growth factor that stimulate cell growth and division. Thus, they are responsible for the skin rejuvenation process.

The preparation used during the treatment with the use of micro-needles helps in the repair of the skin, stimulates fibroblasts to stimulate the production of collagen, allowing in the end to restore the skin's radiance and healthy appearance.
